

SOP V6

Construction
Sector
C-19 Pandemic
**Standard
Operating
Procedures**

Version 6 : December 2020

(Users should refer to CIF website to ensure they are referring to the most current edition)

Disclaimer

The Construction Industry Federation (which shall include their servants and agents and any policy committees of the Construction Industry Federation) (“CIF”) has devised a plan the intention of which is to provide a standardised approach to commencing construction projects in Ireland which incorporates the COVID-19 public health requirements (“the plan”). The use of the plan is subject strictly to the following:

- 1.** CIF does not give any warranty representation or undertaking as to the efficiency usefulness, safety or commercial or technical viability of the plan.
- 2.** All content is for information purposes only and not intended to supersede applicable regulations, nor provide medical or legal advice. CIF makes no representation and gives no warranty as to the accuracy or completeness of any information and/or advice or recommendation contained within the plan and the members attention is drawn to the fact that Government Guidance is changing as knowledge of the COVID-19 virus increase.
- 3.** CIF will not be liable for any losses (direct or indirect) howsoever arising from adoption or implementation of the plan or any aspect of it, or for any injuries , damages, costs and/or expenses arising from the implementation of or use of the plan or any aspect of it.
- 4.** The plan and all information provided is for information purposes only and not intended as a substitute for members and or users carrying out a full risk assessment and review and ensuring that all legal, contractual, safety, welfare at work and health requirements are implemented and complied with in respect of any recommencement of works whether on site or elsewhere and in respect of any use of the plan or any part of it.
- 5.** Any party utilising the plan should take their own independent legal, business and other advice in relation to the applicability or appropriateness of the plan to their individual circumstances or businesses and the CIF does not accept any liability for the use of the plan or its appropriateness for any individual businesses.

5	November 2020	<ul style="list-style-type: none"> Generally updated links Section 7 renamed Introduction updated Updated symptoms Updated control measures Additions to Site Management Section Updated guidance on face coverings in Sec 6 Added ESB induction as equivalent to CIF Induction Added bullet point to Travel to and from work Added advice against sharing computer equipment Updated advice on managing cases Updated return to work process Updated site awareness poster Sample - Site Response to Covid 19 Case action plan
6	December 2020	<ul style="list-style-type: none"> New Section 22 to reflect publication of the Government's Work Safety Protocol Sections formerly numbered 22 and 23 changed Updated First Aid Responder Training Link provided in Section 23 to Guide for Managing an Outbreak in the Workplace

Abstract: This document has been developed by the CIF Safety and Health Subcommittee mindful of the best available guidance, nationally and internationally, and serves as a guide for the management of COVID-19 on a construction site for the duration of the pandemic. The actions set out in this document should be implemented in tandem with an amended Construction Stage Health and Safety Plan. The purpose of this document is to protect workers, their families and the community, whilst also recognising the need to protect livelihoods.

1 Introduction

This is a version 6 of the SOP – updated to reflect publication of the Government’s Work Safety Protocol on 20th November. At the time of writing, we are encouraged to note the emergence of vaccines, but are equally cognisant that their rollout will take some time. Meanwhile, we must continue to follow public health guidelines and industry best practice.

We thank all in the sector for their hard work to date but I want to take this opportunity to call on everyone, companies and workers, to double the efforts to ensure compliance.

The CIF interacts, on behalf of the industry, with politicians from all parties and members of the public. We have gained their trust by complying with the rules and supervising our sites. This trust is just as easily lost so it must be protected. We do this by doing what we have been doing since the pandemic commenced - setting out safe working arrangements and following them.

Let’s keep this going.

Tom Parlon

Director General
Construction Industry Federation

2 What is Coronavirus / Key Control Measures?

COVID-19 is a new illness that can affect your lungs and airways. It's caused by a new (novel) Coronavirus virus called CoronavirusSARS-CoV-2. Current evidence suggests that the virus is significantly more infectious than the flu that circulates every winter. Viruses can be easily spread to other people and patients are normally infectious until all the symptoms have gone. COVID-19 may survive on surfaces for up to 72 hours.

A combination of good personal hygiene and management of social distancing can protect from infection. This is at the core of this document.

Key Control Measures

The following are key control measures required for managing the spread of the virus on construction projects:

► Symptoms

You must ensure that no person with symptoms attends site - reinforce this message regularly. The symptoms are - fever (high temperature), shortness of breath, breathing, loss or change to their sense of smell or taste.

According to the HSE, "most people can stop self-isolating when both of these apply:

- 1) *you have had no fever for 5 days*
- 2) *it has been 10 days since you first developed symptoms*

If you tested positive because you are a close contact, you may have no symptoms. In this case, you can stop self-isolating 10 days from the date of your test.

If you are caring for someone who cannot self-isolate you should restrict your movements for 17 days" (<https://www2.hse.ie/conditions/coronavirus/managing-coronavirus-at-home/self-isolation.html>).

It should be noted that experience has shown that COVID-19 is spread by people not showing symptoms.

Current HSE advice is available at <https://www2.hse.ie/conditions/coronavirus/close-contact-and-casual-contact.html#close>

Key Control Measures *continued*

▶ **General Health**

Personnel living with “at risk groups” as defined by the Health Services Executive (HSE), must consider if there is a heightened risk from attending work.

▶ **Travel**

Persons returning to the island of Ireland should refer to the most up to date information and guidance from the HSE and the Department of Foreign Affairs. This information can be found at <https://www.dfa.ie/travel/travel-advice/>

▶ **HSE COVID Tracker App**

Companies should encourage employees to download the tracker app. Persons should download the HSE’s free Covid-19 tracker app for mobile phones, by visiting Apple’s App Store or the Google Play Store. The mobile app uses Bluetooth to alert subscribers if they have been in close contact with another registered app user who has tested positive for Covid-19.

▶ **Hand Hygiene**

Ensuring everyone is washing hands regularly and thoroughly or sanitizing and sufficient facilities are provided and maintained to allow this to happen.

▶ **Social Distancing**

Ensuring workers maintain a minimum of 2 metre separation insofar as possible while working, when using toilets, canteens, drying rooms etc. Also, to promote social distancing when travelling to and from work (public transport, vans etc.), and in their daily lives, in order to limit exposure.

▶ **Cough Etiquette / Respiratory Hygiene**

Ensuring people cough / sneeze into sleeve or elbow, always cover up, dispose of tissues appropriately.

▶ **Cleaning**

Ensuring that all frequently touched objects and surfaces are regularly cleaned and disinfected.

▶ **Face Covering / Mask**

The wearing of a face covering / mask has been shown to reduce the rate of transfer of the virus .

The above-mentioned control measures are elaborated on throughout this document and all individuals need to take personal responsibility to advise their employer of any symptoms immediately.

Please bear in mind current public health guidelines when planning work activities, notably the existence of restrictions in accordance with the government’s ***‘Resilience and Recovery 2020-2021: Plan for Living with COVID-19’***

<https://www.gov.ie/en/campaigns/resilience-recovery-2020-2021-plan-for-living-with-covid-19/>

3 Role of the Client

The construction industry is largely a service industry. Contractors work for clients under a construction contract. In most instances, compliance with these Standard Operating Procedures (SOP) involves changes to the schedule or delivery programme for construction projects. Therefore, the implementation of these SOP's must have the support of the client and be implemented in accordance with the necessary contractual instructions from clients. A contractor cannot operate unilaterally and each site and project is unique in terms of its design and the tasks associated with its construction. Clients must therefore accept that adapting and complying with the good practice illustrated in this SOP has productivity

and cost implications. It is therefore recommended that as construction continues on site, a revised risk assessment is conducted by the client and contractor to ensure the project can recommence, revised delivery schedules are agreed, revised work programmes are agreed and/or any necessary contractual instructions are issued by the client which make it possible to comply with these SOP's.

On certain projects where the client and the builder are the same entity (such as housing projects) it is still recommended that a revised risk assessment is carried out before implementing these SOP's.

4 Health and Safety Documentation

Prior to construction projects commencing project health and safety documentation should be reviewed to ensure that the documentation is aligned with the measures as outlined in this "Construction Sector C-19 Pandemic SOP" and the Government's Work Safety Protocol, general / standard health and safety requirements, considering the constraints of COVID-19.

It is recommended that each PSCS / Contractor / Developer should document a specific COVID-19 Plan in line with this document and in consultation with the Client. The resulting plan should consider and address the level(s) of risk associated with the project and tasks that workers perform on site. On each project, the PSCS, in consultation with other contractors, will appoint COVID-19 Compliance Officer(s) and workers Safety Representative as necessary depending on the size, scale and complexity of the project.

Insurance

Before commencing activities onsite, contractors are advised to contact their insurance broker or insurance advisor for direction.

Safety Statement

It is advised that contractors review their Safety Statement and associated risk assessments, considering COVID-19.

Risk Assessments / Method Statement (RAMS)

Risk assessments and method statements for all work on site should be reviewed to address the risk of COVID-19 and the associated control measures required. Particular emphasis will be required on 'close working', i.e. where persons work within 2m of each other (2m being the HSE recommended separation for social distancing).

Section 17 of this document deals with 'close working'.

Daily Briefings Documents

To ensure consultation with workers, it is recommended that daily briefing documents such as SSWP's, SPA's, Daily Safe Starts, Task Briefings or equivalent should be updated to reference COVID-19 and specifically social distancing and hand hygiene.

Basic COVID-19 control measures to be highlighted on all such documents, as per illustrated example.

DAILY SAFE START

5 Site Management

Site Management and Supervision

For the purposes of the document, anyone with supervisory responsibilities is classified as site management.

Responsibilities of Site Management for COVID-19

Site management must risk assess and manage safety and health hazards in the workplace. In the context of the application of the requirements of this C-19 SOP, responsibilities include managing and instructing site workers on the various control measures and compliance. This SOP identifies a number of key management responsibilities during the implementation of this Plan. These responsibilities are elucidated hereafter.

Note: *Project teams must stay agile as new information comes available that may change approach in procedures, processes or PPE.*

Pre-Planning for works

Site management are responsible for ensuring that all personnel on site, including sub-contractor management/staff have been made aware of the specific requirements of the site-specific Construction Stage Health and Safety Plan. Specifically:

- ▶ To ensure that a member(s) of the management team is appointed as the C-19 Compliance Officer.
- ▶ To ensure that appropriate personnel from the PSCS/Contractor and the sub-contractors are appointed as C-19 Compliance Officer(s).
- ▶ To ensure that Safety Representative(s) / Lead Workers Representative(s) have been selected.
- ▶ CIF Online C-19 Induction has been undertaken by all site personnel prior to coming to site. Ensuring that non-compliant personnel are not permitted on site. Please note that the CIF recognises the ESB COVID-19 induction as being equivalent.
- ▶ The inclusion of COVID-19 as a hazard in their Risk Assessment and Method Statement (RAMS) for their work activities.
- ▶ To ensure that this RAMS is effectively reviewed, approved and communicated.
- ▶ To ensure that all site facilities are sufficient to allow for the social distancing and hygiene requirements of this SOP and to take appropriate immediate action where they are not.

On-Site

Site management responsibility includes assessing various work scenarios to ensure that the key requirements such as worker distancing and hygiene/PPE controls are being implemented. This may involve discussions with client and PSDP. It will involve conducting regular site walks and inspections. Continuity of work crews to be encouraged for ease of contact tracing purposes. Experience has shown that keeping workers in “pods” can assist in reducing virus transfer and reduce possible contacts.

Site Workers

It is vital that each worker knows how to work safely during this COVID-19 pandemic and understands the requirements of their task specific RAMS. Site management should coach and guide workers during the workday to ensure that they are fully compliant with the requirements. Workers should also note that they have a personal responsibility, to their colleagues and family, to follow the guidelines for safe working but also to inform site management of any issue that impacts on site safety - e.g. close contacts / positive cases.

Management Approach

Site management’s main priority is ensuring that their plan is implemented at all levels and at all times with the co-operation of all stakeholders – Clients, PSDP, Contractors, Workers and Suppliers.

General Site Work Activities

1. **Reduce** - the number of persons-in any work area to comply with the 2-metre social distancing guideline recommended by the HSE (e.g. relocate workers to other tasks, review work schedule and task sequence, consider staggered starting and finishing times etc.).
2. **Review** - work practices, mindful of close working arrangements. Coach site personnel to self-assess their task for social distancing and transmission points.
3. **Supervise** – or mentor appointment of C-19 Compliance Officer to specifically monitor adherence to social social distancing and hygiene etiquette.

6 Hygiene

Good hygiene and hand washing

All site personnel should follow this advice and encourage others to follow this advice too. Site management should provide toolbox talks on how to perform hand hygiene effectively - see <https://www2.hse.ie/wellbeing/how-to-wash-your-hands.html>

DO:

- ▶ Wash your hands properly and often. Hands should be washed:
 - *after coughing or sneezing*
 - *before and after eating*
 - *before and after preparing food*
 - *if you were in contact with someone who has a fever or respiratory symptoms (cough, shortness of breath, difficulty breathing)*
 - *before and after being on public transport if you must use it*
 - *before and after being in a crowd (especially an indoor crowd)*
 - *when you arrive and leave buildings including your home or anyone else's home*
 - *before having a cigarette or vaping*
 - *if your hands are dirty*
 - *after toilet use*
- ▶ Cover your mouth and nose with a tissue or your sleeve when you cough and sneeze.
- ▶ Put used tissues into a bin and wash your hands.
- ▶ Clean and disinfect frequently touched objects and surfaces.

DON'T:

- ▶ Do not touch your eyes, nose or mouth if your hands are not clean.
- ▶ Do not share objects that touch your mouth – for example, bottles, cups.

SOAP KILLS COVID-19

WASH YOUR HANDS

Wash your hands well and often to avoid contamination - **for a minimum of 20 seconds.**

HSE Live number on **1850 24 1850**

For more information, see: <https://www2.hse.ie/conditions/coronavirus.html>

CONSTRUCTION INDUSTRY FEDERATION

Disposable gloves

Do not wear disposable gloves in place of washing hands. The virus can get on gloves in the same way it gets on hands. Also, hands can become contaminated when when gloves are taken off.

Disposable gloves are worn in medical settings. They are not as effective in daily life. Wearing disposable gloves can give a false sense of security. Disposable gloves are generally not required for infection prevention and control purposes.

A person might potentially:

- ▶ sneeze or cough into the gloves - this creates a new surface for the virus to live on
- ▶ contaminate yourself when taking off the gloves or touching surfaces
- ▶ not wash your hands as often as you need to and touch your face with contaminated gloves.

Face Masks / Face Coverings - General Use

Based on current scientific evidence, the wearing of face coverings in general use, can reduce the transfer of the virus. The mandatory wearing of face coverings in certain public places is required - <https://www2.hse.ie/conditions/coronavirus/face-masks-disposable-gloves.html>.

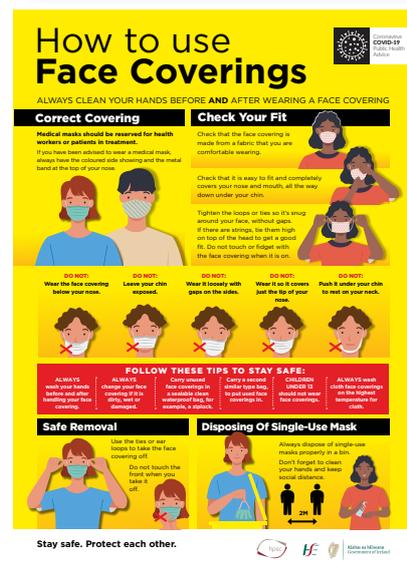

Contractors should review the on site requirements for the general wearing of face coverings, with the following issues to be considered.

- ▶ Working inside buildings / structures;
- ▶ In site welfare and compound areas, in office environments (except where a person is sitting at a work station);
- ▶ Generally, in locations where social distancing is not possible;
- ▶ Where a risk assessment shows that there is no adverse consequence to wearing a face covering;
- ▶ If wearing a face covering does not have any adverse impacts, then they should be worn.

The Work Safety Protocol makes provision for implementing temperature testing in line with Public Health advice. Currently, there is no public health requirement to undertake temperature testing/screening in the workplace. **The preference is to ensure social distancing and good hygiene measures.** However, some employers may have included provisions for temperature screening as part of their return to work measures.

Site Management should consider additional measures to ensure the containment of the virus; these include posters and/or leaflets to advise workers of the hazards associated with COVID-19 and the measures to be taken to prevent the spread of the disease.

The Health Services Executive (HSE) and CIF have prepared a selection of posters which can be displayed in all workplaces and sites. A link to these posters is provided in Section 23.

7 Commencing Work - Sites

In advance of sites commencing, all construction companies must consider the following, in conjunction with communications and briefings that will be required:

- ▶ Safety and Health Plans, Safety Statement and other relevant documents will have to be communicated to all staff members
- ▶ Construction Stage Health and Safety Plan must be communicated to all Site Management
- ▶ All site personnel and visitors must complete the 'CIF Online C-19 Induction' (or ESB equivalent programme).
- ▶ All persons returning to site must complete a COVID-19 Questionnaire / self declaration. It is recommended that this be completed and submitted by each main contractor / contractor / developer at least 24 hours in advance of persons returning to site – ***if conditions change at any time, resulting in a re-appearance of symptoms – workers should be advised not to come to work !***
- ▶ The questionnaire / self declaration is designed to seek confirmation that the individual has no symptoms of COVID-19 and is not waiting a COVID-19 diagnosis.
- ▶ Persons returning to work must ensure that they follow the HSE guidance which can be found here - <https://www2.hse.ie/conditions/coronavirus/returning-to-work-safely.html>

Example of toolbox talk while applying social distancing

8 Travel to / from Work

Where a worker exhibits any signs of COVID-19 or has been exposed to a confirmed case, they should not travel to work.

Wherever possible, workers should travel to site alone using their company vehicle or their own means of transport.

Where public transport is the only option for workers, face masks must be worn, then regular toolbox talks outlining how to reduce the possibility of infection should be considered.

Site management must consider the following:

- ▶ Parking arrangements for additional cars / vans and bicycles.
- ▶ Providing hand cleaning facilities at entrances and exits. This should be soap and water wherever possible or hand sanitiser if water is not available.
- ▶ How someone taken ill would get home.
- ▶ Workers travelling together in vehicles are automatically "Close Contacts" - site management should endeavour to understand who is sharing vehicles and group them in working pods.

Social Distancing in Vehicles

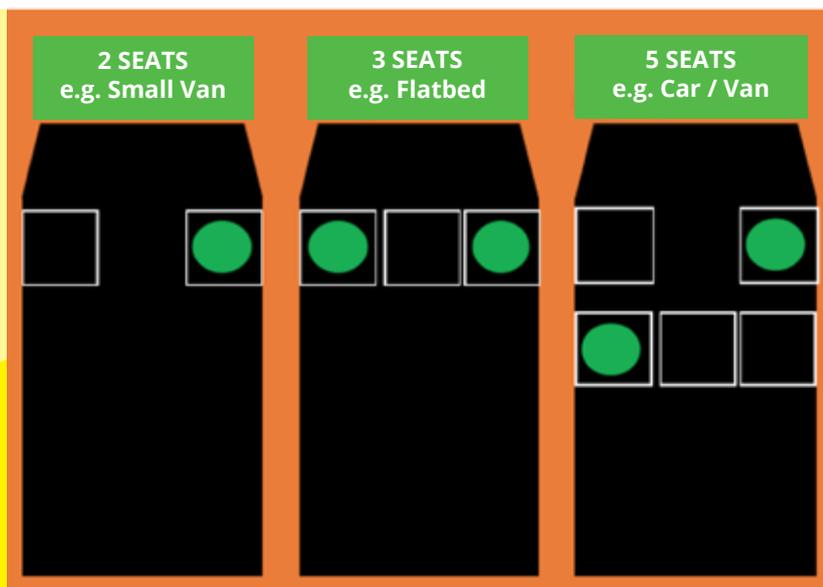

Social distancing is advised when travelling in vehicles to/from work and when in site vehicles and operating mobile plant.

Note : Knowing who is sharing vehicles will assist with contact tracing.

Suggested arrangements are as follows:

- ▶ **Single occupancy of vehicles is preferable.**
- ▶ Sit as far apart as the vehicle allows.
- ▶ In circumstances where it is impractical to limit occupancy to one or two persons, additional control measures should be adopted (e.g. use of face masks, face shields, use of screens between occupants, provision of good ventilation).

RECOMMENDED ROAD VEHICLE OCCUPANCY

Other Control Measures for Vehicle Use

Workers should not enter a work vehicle with others if they have any symptoms or have had contact with a confirmed case of COVID-19.

General guidance for minimising the potential transmission of COVID-19 are:

- ▶ Employers should consider requesting personnel to use personal transport to reduce numbers travelling in work vehicles.
- ▶ It is advisable to limit the “churn” of people travelling together (i.e. try to ensure the same crew members travel and work together day after day and where possible , keep them working in a pod).
- ▶ When entering (and leaving) all vehicles the driver should clean all common areas that are liable to be touched including the external door handles, keys and other internal furnishings.
- ▶ Keep windows at least partially open.
- ▶ Keep personal items (PPE, clothes, lunch boxes etc.) separate.
- ▶ Wiping/cleaning down of contact points should be done using antibacterial wipes or a wet cloth with soap application, or equivalent.
- ▶ Dispose of used wipes/cleaning materials in a designated bin/sealed bag and wash hands ‘with soap’ for at least 20 seconds.
- ▶ If availing of public transport, sit down to minimise contact with frequently touched surfaces, handles, roof straps, isolation bars and wear a face covering etc.
- ▶ Carry hand sanitiser (at least 60% alcohol) and use it regularly throughout your journey.

Note: It is noted that it is commonplace in the construction sector for family members to travel together or workers, who lodge together, to travel together (i.e. essentially a “family unit”).

Recommended Road Vehicle Seating Arrangements

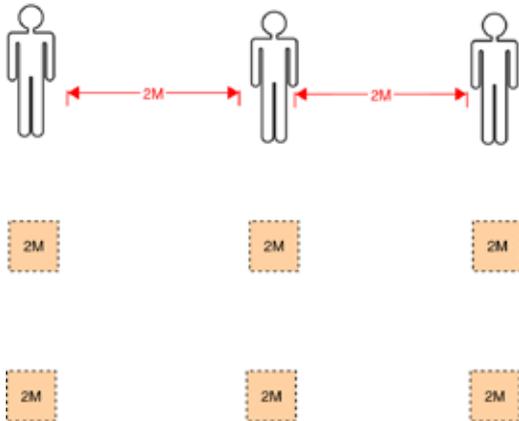

No. of seats	Max no. of occupants	Seating arrangement
2	1	1 driver
3	2	1 in the driving seat 1 in the far passenger seat
5	2	1 in the driving seat 1 in the far passenger seat

9 Prevention of Cross Contamination

Site Entry

The potential for cross contamination is higher at site entry and exit points and where there are high levels of surface contact points such as in welfare areas, site walkways, stairs access etc.

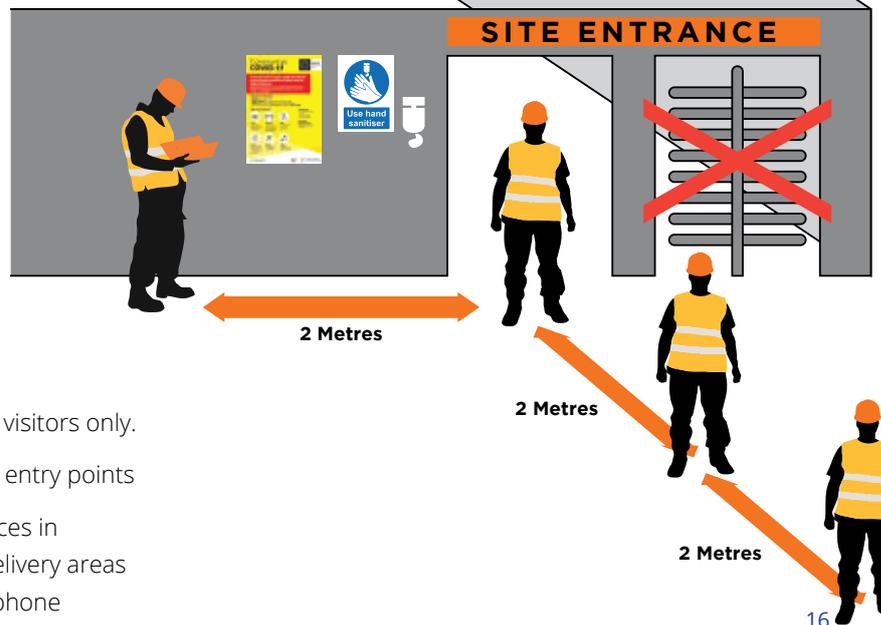

SITE SIGN-IN

Recommended Control Measures

The following are recommended controls measures at access points to all construction sites:

- ▶ Reduce the number of people in attendance at site inductions and consider holding them outdoors wherever possible
 - ▶ Delivery drivers should remain in their vehicles if the load will allow it and must wash or clean their hands before unloading goods and materials
 - ▶ All persons entering site must be directed to wash their hands and additional hand washing stations should be provided where possible
 - ▶ Touch points should be minimised with a “handsfree” approach where possible
 - ▶ On access routes throughout site, one-way systems should be implemented where possible, barrier gates should be wedged open, and touch points should be cleaned regularly.
- ▶ Record details of entrants to site to assist with contact tracing - further detail in Section 18
 - ▶ Turnstiles to be by-passed with open door access to site
 - ▶ Thumb access devices should be by-passed / turned-off
 - ▶ Stagger site start times / finishing times to reduce queues
 - ▶ Multiple entry points depending on site numbers
 - ▶ Security guards to record all names rather than having multiple persons signing-in using shared pen/booklet
 - ▶ Restrict entry to workers and essential visitors only.
 - ▶ Sanitising stations in position at all site entry points
 - ▶ Regularly clean common contact surfaces in reception, office, access control and delivery areas (e.g. scanners, turnstiles, screens, telephone handsets, desks, particularly during peak flow times)

Cleaning to Prevent Contamination

Enhanced cleaning procedures should be in place across all sites to prevent cross contamination, particularly in communal areas and at touch points including:

- ▶ Taps and washing facilities
- ▶ Toilet flush and seats
- ▶ Door handles and push plates
- ▶ Handrails on staircases and corridors
- ▶ Lift and hoist controls
- ▶ Machinery and equipment controls
- ▶ Food preparation and eating surfaces
- ▶ Communications equipment
- ▶ Keyboards, photocopiers and other office equipment
- ▶ Rubbish collection and storage points should be increased and emptied regularly throughout and at the end of each day
- ▶ Regular cleaning of site welfare facilities, handrails and touch points should be undertaken.

The HSA advises that contact/touch surfaces such as table tops, work equipment, door handles and handrails should be cleaned at least twice daily, with modified cleaning intervals for rooms and work areas. For washroom facilities and communal spaces, cleaning should be performed at least twice per day.

CONTACT POINTS WITHIN A VEHICLE

- Steering Wheel
- Gearstick
- Handbrake
- Door Handles
- Radio & Infotainment Controls
- Steering Column (*Indicators, Windscreen Wipers, Cruise Control*)
- Elbow Rests
- Seat Position Controls
- Door Frame

Tools, Equipment and Plant

- ▶ All tools and equipment should be properly sanitised to prevent cross contamination.
- ▶ Arrangements for one individual to use the same tool, equipment and plant as much as possible. Make available cleaning material for all tools to be wiped down with disinfectant between each user. Organise work practices eliminate or reduce transmission points and coach site personnel on the same.
- ▶ Cabs and touch points of site vehicles and plant (MEWPS, Excavators, Cranes, etc.) to be thoroughly cleaned and a cleaning regime by plant operatives should be maintained daily thereafter.
- ▶ Consider provision of stickers for tools, equipment and mobile plant to encourage disinfection.

EXAMPLES OF STICKERS TO PROMOTE CONTROLLED USE OF MOBILE PLANT/EQUIPMENT

**CONTACT POINTS
WITHIN A MINI DIGGER**

10 Social Distancing

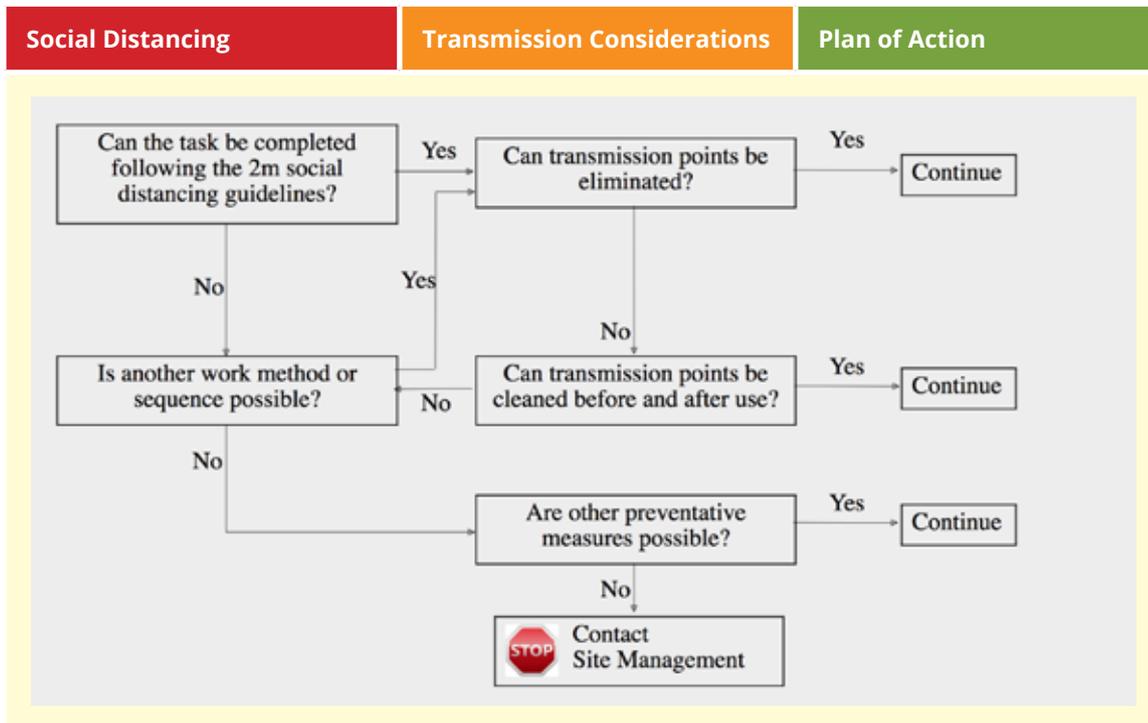

What is social distancing?

Social distancing, or physical distancing, is a set of interventions or measures taken to prevent the spread of a COVID-19 by maintaining a physical distance between people and reducing the number of times people come into close contact with each other.

In order to slow the transmission rate of COVID-19, a social distancing of minimum 2m is recommended by the HSE.

Note: Social distancing should be considered in the vertical as well as horizontal when planning works e.g.: when working on scaffold.

The flow chart below is provided to assist in the review of work processes with social distancing in mind.

11 C-19 Compliance Officer

This section is intended to outline the role and duties of a COVID-19 Compliance Officer ('C-19 Compliance Officer') for sites of all sizes in line with the Government's recommendations to monitor Social Distancing.

Projects should also facilitate the selection of at least one Site Safety Representative / Lead Worker Representative to assist with ensuring that Covid-19 measures are strictly adhered to.

Note: Role of the Lead Workers Representative is as outlined in the Government's Work Safety Protocol.

Note 2: Free, online training for the Lead Worker Representative is available at https://www.hsa.ie/eng/topics/covid-19/hsa_return_to_work_safely_online_courses/hsa_return_to_work_safely_online_courses.html

It is important that the right candidate is appointed/ selected as a C-19 Compliance Officer.

Projects must assess how many C-19 Compliance Officers are required depending on size, environment, number of personnel and the work activity to be monitored. C-19 Compliance Officer's duties should be shared among all contracting companies on a project.

Social distancing compliance is the responsibility of everyone.

A backup must be available in the event of a C-19 Compliance Officer going on training, annual leave or being off sick.

**EXAMPLE OF
HIGH VISIBILITY
VESTS TO IDENTIFY
C-19 COMPLIANCE
OFFICER / SITE SAFETY
REPRESENTATIVE(S)**

Details of the assigned C-19 Compliance Officer and Site Safety Representative(s) to be communicated on site safety notice boards.

Role of a C-19 Compliance Officer

- ▶ The role of a C-19 Compliance Officer is to monitor day to the site activities to ensure social distancing and hygiene rules are being maintained to protect health and reduce the spread of the C-19 virus. This individual may have other responsibilities.
- ▶ These key personnel should be clearly identifiable onsite with a high viz vest noting C-19 Compliance Officer written on them. The class of hi viz provided should be appropriate to the location that the worker will be working - readers should consult ISO 20471:2013+A1:2016
- ▶ The persons undertaking the role of C-19 Compliance officer and the Site Safety Representative(s) must receive training (inhouse / CIF webinar) in what the roles entail.
- ▶ Ensuring compliance to the 2m social distancing rule and good hygiene is not the sole responsibility of the C-19 Compliance Officer. Their role is supported by all site management, Site Safety Representative(s) and workers.
- ▶ Site Management must communicate to all onsite details of the appointed C-19 Compliance Officer(s).
- ▶ A C-19 Compliance Officer must not put themselves at risk while carrying out their duties.
- ▶ C-19 Compliance Officers must have a structure or framework to follow within the organisation to be effective in preventing the spread of COVID-19. This structure must be regularly audited and managed to ensure it works and protects all onsite. Failure to take it seriously could result in an outbreak of COVID-19 onsite.

Note: The C-19 Compliance Officer should be suitably knowledgeable in terms of Covid-19 prevention measures; no formal training is required, and in-house training would be acceptable. The CIF has provided free access to a recorded webinar, accessible here: <https://ciftraining.ie/cpd-courses/c-19-compliance-officer/>

Responsibilities of a C-19 Compliance Officer

C-19 Compliance Officer's responsibilities and duties fall broadly into 2 categories:

1. Proactive day to day duties
2. Reactive emergency duties

Proactive day to day duties of a C-19 Compliance Officer

- ▶ Ensure personnel onsite complete relevant COVID-19 Questionnaires / Declarations.
- ▶ Being a constant onsite presence to monitor compliance with social distancing of 2 metres between all personnel onsite (with the exception of planned close working). In instances where there is non-conformance with social distancing the C-19 Compliance Officer is to intervene.
- ▶ Maintain a log of regular monitoring of COVID-19 controls on site.
- ▶ Ensure there is sufficient up to date signage erected onsite to educate all personnel about the COVID-19 controls on site.
- ▶ At all times promote and coach good hygiene practices to all personnel onsite.
- ▶ Ensure regular cleaning of welfare facilities, handrails, door handles, etc. is undertaken.
- ▶ Ensure hand wash liquid/soap and hand sanitisers are replenished as required.
- ▶ Check hot water and hand drying facilities are available onsite.
- ▶ Make representations to site management with regards any COVID-19 concerns raised by site personnel to the C-19 Compliance Officer.

- ▶ Ensure site personnel are adhering to staggered break time schedules and limiting numbers in canteens, drying rooms and smoking areas cognisant of the 2-metre social distancing guideline.
- ▶ Ensure site personnel leaving site at designated breaks remove their site PPE and continue to adhere to social distancing guidelines.
- ▶ Report any areas of non-compliance to site management and ensure these are addressed.
- ▶ Consider provision of additional controls for exceptional circumstances
- ▶ Keep up to date on HSE guidelines.

Reactive C-19 Compliance Officer duties

While the main role of the C-19 Compliance Officer is to prevent the spread of COVID-19 onsite, there is the potential where an individual onsite may experience COVID-19 symptoms and where the C-19 Compliance Officer needs to react.

In a reactive position, their responsibilities include:

- ▶ Informing site management if there is a confirmed case or if they have been made aware of an individual with COVID-19 symptoms.
- ▶ Isolating an individual with symptoms in an isolation room/segregated area away from other personnel.
- ▶ Following site protocol for individuals with COVID-19 symptoms. (i.e. send home, inform them to contact GP).
- ▶ Assisting in contact tracing should there be a confirmed case of COVID-19.

12 Communal and Welfare Areas

Office arrangements

- ▶ All non-essential site personnel should be encouraged to work from home where possible – usual supports required.
- ▶ Personnel working in site offices should be dispersed so there is always a social distance of 2m.
- ▶ Eliminate non-essential visitors attending offices.
- ▶ Use I.T software to support online meetings both in and out of the office.
- ▶ Keep workstation surfaces clear and wipe with disinfectant regularly.
- ▶ Hand sanitizers should be made available at main entry and exit points.
- ▶ Keep main doors open where possible to reduce persons touching door handles etc.
- ▶ Increase the cleaning regimes including a wipe down with disinfectant on door handles, stair rails etc. at regular intervals throughout the day.
- ▶ Wear face covering when moving about offices and not at work station.

Toilet Facilities

- ▶ Restrict the number of people using toilet facilities at any one time. Ensure there is a social distance of 2m maintained while using the toilet facility.
- ▶ Implement appropriate COVID-19 hygiene regime.
- ▶ Ensure soap and hand washing pictorial guides provided for washing hands are clearly visual and in a form manner and language understand for all.
- ▶ Enhance the cleaning regimes for toilet facilities particularly door handles, locks and the toilet flush handle.
- ▶ Provide suitable and sufficient rubbish bins for hand towels with regular removal and disposal.

OFFICE SPACE

Canteens and Eating Arrangements

The following is suggested to ensure a social distancing of 2m.

- ▶ **Whilst there is a requirement for construction sites to provide a means of heating food and making hot drinks, a pandemic is an exceptional circumstance and workers attending site canteens should be advised where possible to bring a packed lunch and flask to help eliminate transmission points on microwaves and water pour points etc.**
- ▶ Break times should always be staggered to reduce congestion and contact.
- ▶ Face coverings should be worn, except when seated at a table to eat or drink.
- ▶ Site personnel must be encouraged to wash their hands before eating.
- ▶ Hand cleaning facilities or hand sanitiser should be available at the entrance and exit of any room where people eat and should be used by all personnel when entering and leaving the area.
- ▶ Ensure a seating arrangement where workers sit 2 metres apart from each other whilst eating and avoid all physical contact with co-workers.
- ▶ Where catering is provided on site, consider the provision pre-prepared and wrapped food only.
- ▶ Payments should be taken by contactless card wherever possible.
- ▶ Tables should be cleaned between each use and sitting based on rota.
- ▶ All rubbish should be disposed in a suitable bin.
- ▶ Tables should be clear when finished eating.
- ▶ All areas used for eating must be thoroughly cleaned after each use, including chairs, door handles, vending machines and payment devices etc.
- ▶ Provide illustrations of 2 metre spacing to clearly demonstrate social distancing.

Drying Rooms

The following is suggested to ensure a social distancing of 2m.

- ▶ Introduce staggered start and finish times to reduce congestion and contact at all times.
- ▶ Face covering should be worn.
- ▶ Introduce enhanced cleaning of all facilities throughout the day and at the end of each day.
- ▶ Consider increasing the number or size of facilities available on site if possible
- ▶ Based on the size of each facility, determine how many people can use it at any one time to maintain a distance of 2 metres.
- ▶ Provide suitable and sufficient rubbish bins in these areas with regular removal and disposal.
- ▶ Identify 2-metre social distancing areas.
- ▶ Remove all unnecessary items.

13 Site Walkways and General Access

To assist with social distancing, implement the following:

- ▶ A one-way system on access routes throughout the site where possible. Increasing access points can help establish a one-way system. (e.g. An additional HAKI stair to allow for one-way traffic up and down).
- ▶ Where a one-way system is not possible consider widening pedestrian routes so social distancing can be maintained on main site walkways.
- ▶ Marked up walkways can help give an indication of what 2-metre spacing looks like.

SOCIAL DISTANCING ONSITE

14 First Aid Responder Guidance

- ▶ COVID-19 infects people through contact with the mucous membranes. First Aid Responders must think of these as being the mouth, nose and eyes. **It does not infect through the skin.**
- ▶ The greatest element of risk for a First Aid Responder is transfer of the virus to the mucous membranes by contact of contaminated hands (including contaminated gloved hands) with the eyes, nose or mouth.
- ▶ The key interventions to manage this risk are to minimise hand contamination, avoid touching your face and clean your hands frequently with soap and water or alcohol-based hand gel.
- ▶ There is also a significant risk of direct transfer of the virus on to mucous membranes by droplet transmission, that is, by direct impact of larger infectious virus droplets generated from the person's respiratory tract landing directly in your eyes, nose or mouth. **This risk is managed by use of appropriate PPE (mask and eye protection) and by providing the ill person with a mask to cover their nose and mouth when coughing or sneezing (respiratory hygiene and cough etiquette).**
- ▶ If, as a First Aid Responder, you can avoid close contact with a person who may require some level of first aid, do so. This, of course, will not be possible in the event of having to provide emergency lifesaving measures such as an incident of cardiac arrest, heart attack, choking, stroke.
- ▶ First Aid Responders should be familiar with the symptoms of COVID-19, as per graphic below. You will need to perform a "dynamic risk assessment" based on the scenario you are presented with.

Symptoms	CORONAVIRUS <i>Symptoms range from mild to severe</i>	FLU <i>Abrupt onset of symptoms</i>	COLD <i>Gradual onset of symptoms</i>
Fever or chills	Common	Common	Rare
Cough	Common (usually dry)	Common (usually dry)	Mild
Shortness of breath	Common	No	No
Lost or changed sense of smell or taste	Common	Rare	Rare
Fatigue	Common	Common	Sometimes
Aches and pains	Common	Common	Common
Sore throat	Sometimes	Sometimes	Common
Headaches	Sometimes	Common	Rare
Runny or Stuffy Nose	Sometimes	Sometimes	Common
Feeling sick or vomiting	Rare	Sometimes	No
Diarrhoea	Rare	Sometimes in children	No
Sneezing	No	No	Common

Key Control Measures

- ▶ Standard infection control precautions to be applied when responding to any first aid incident in the workplace. Hand washing with warm water and soap or an alcohol-based hand gel must be performed before and after providing any first aid treatment.
- ▶ Any person presenting with symptoms consistent with COVID-19 should be treated as a suspected case.
- ▶ In such cases, move individual to a first aid room / isolated room to minimise risk of infection to others.
- ▶ Only one First Aid Responder to provide support/ treatment, where practical.
- ▶ Additional PPE (enclosed eye protection and FFP3 mask if available) should be worn by First Aid Responders when responding to all first aid incidents where close contact cannot be avoided. Please also have a mask available to give to person if they are displaying symptoms consistent with COVID-19 to limit droplet dispersion.
- ▶ If you suspect a person has experienced a cardiac arrest, do not listen or feel for breathing by placing your ear and cheek close to the person's mouth. If you are in any doubt about confirming cardiac arrest, the default position is to start chest compressions only until help arrives. To iterate the point, a person in cardiac arrest should have **compression only CPR** applied.
- ▶ Persons with minor injuries (cuts, abrasions, minor burns) - where practical, a First Aid Responder should avoid close contact and advise the injured party what steps to take in treating their injury.
- ▶ No reusable equipment should be returned to service without being cleaned/disinfected appropriately.

PPE Requirements

The following PPE must be available for responding to first aid incidents:

- 1. Disposable gloves (nitrile/latex)**
- 2. FFP3 or FFP2 or other face coverings providing suitable protection**
- 3. Disposable plastic aprons**
- 4. Enclosed eye protection**

First Aid Responder must ensure that the mask covers both the mouth and nose and is fitted correctly to create an adequate seal to the face.

Following first aid treatment, disposable PPE and any waste should be disposed of appropriately and reusable PPE cleaned/disinfected thoroughly.

Wash hands thoroughly with warm water and soap before putting on and after taking off PPE.

Replenish PPE stock as appropriate. Liaise with your Project Lead or designated person to ensure any issues with first aid PPE are resolved in as timely a manner as possible.

15 Management of Meetings

All meetings, where possible, must be conducted virtually using on-line systems for remote meetings unless it is **absolutely necessary** to meet face-to-face. In these circumstances, keep the numbers attending as small as possible ensuring the mandatory 2m distance apart. The meeting time should be kept as brief as possible.

According to the HSA, there is no time restriction on how long workers can be in the same room observing physical distancing advice, however HPSC Guidelines in the identification of contacts for contact tracing purposes states that "For those contacts who have shared a closed space with a case for longer than two hours, a risk assessment should be undertaken taking into consideration the size of the room, ventilation and the distance from the case. This may include office and school settings and any sort of large conveyance.

Site Meetings

- ▶ Only '**absolutely necessary**' meeting participants should attend.
- ▶ Attendees should be 2m apart from each other.
- ▶ Rooms should be well ventilated/windows open to allow fresh air circulation.
- ▶ Consideration to be given to hold meetings in open areas where possible.
- ▶ Experience has shown that sharing of IT equipment etc. at meetings contributes to transmission of the virus. Eliminate where possible - if not, sanitise the equipment between users.

16 Management of Deliveries

Site Management should:

- ▶ ensure that all delivery transactions enforce physical distancing.
- ▶ agree a delivery protocol with suppliers and hauliers.
- ▶ all deliveries must be planned with allocated times for collections/appointments/deliveries.
- ▶ make arrangements for paperless delivery acceptance and acknowledgements with suppliers to ensure materials management and material reconciliations are accurate.
- ▶ ensure that hand washing facilities are available convenient to set down and goods inward locations.
- ▶ ensure there are appropriate sanitising arrangements at points of site access, egress and set down areas for raw materials and stock.

17 Close Working

This section outlines guidance relating to COVID-19 Particular Risks for short-term work that must be completed where workers are less than 2 metres apart (<2m).

Elimination of Close Working:

Elimination of close working is preferable and should be investigated and prioritised.

For all companies and management putting personnel to work, it is critical that you explore every available option possible before putting personnel to work in < 2m close contact tasks.

Stages of the construction process where <2m tasks can be eliminated /mitigated: (including a non-exhaustive list of examples)

- ▶ Design – sections of materials are:
 - **A)** 2.5m long or longer OR
 - **B)** Materials can be installed by an individual (lightweight/ fixings are simplified)
 - **C)** Mechanical means for lifting and access can be used while keeping construction personnel >2m apart
- ▶ Planning for work: RAMS / Planning / Sequencing / Coordination / Communication – All tasks planned via a pre-planned safe system of work shall consider eliminating <2m work.
- ▶ RAMS must consider elimination of work within 2m as the first priority. Where this is not possible the RAMS must detail the control measures for persons working <2m on the task.

Why tasks where personnel are <2m apart require additional focus and daily oversight?

In Ireland, the Health Service Executive (HSE) has recommend a 2 metre safe distance between individuals to avoid transmission hazards. Where a risk assessment identifies work where 2 m separation cannot be maintained, additional safety precautions are required to manage the risk.

Requirements for personnel working within 2m of each other:

- ▶ No worker has symptoms of COVID-19.
- ▶ The close contact work cannot be avoided.
- ▶ PPE is present in line with the RAMS / Risk Assessment (full face shield etc).
- ▶ An exclusion zone for <2m work will be set up pre task commencement.
- ▶ Prior to donning appropriate gloves, personnel shall wash / sanitise their hands thoroughly.

- ▶ There are 2 types of work in the <2m transmission zone,
 - **A)** no physical contact between colleagues
 - **B)** physical contact will occur (manual handling / pushing – pulling side by side, shared tools and equipment).
- ▶ Scenario B is of higher risk than scenario A.
- ▶ A task specific risk assessment is required to identify the appropriate PPE / combination of PPE - e.g. faceshield / mask (surgical type / FFP3/FFP2 / other) , eye protection / disposable suit / gloves*.

**note previous comments regarding disposable gloves (p.10).*
- ▶ If it is possible to erect a physical barrier / safety signage that does not impede the work between colleagues and does not increase work safety hazards (lack of communication / visibility), please consider your options. (e.g. hanging clear plastic / mobile frame with plexiglass).

Note: The full-face visor replaces plexiglass as a physical airborne barrier between colleagues provided there is adequate air circulation.
- ▶ At the end of the task, all tools and equipment for scenario A & B work must be sanitized properly - as should any surfaces safe to wipe down.
- ▶ Forced ventilation internally could be considered for restricted confined spaces.

Oversight:

Following assessment that the task has to be completed within the 2 m zone, and review of controls, the contractor's supervisor may issue a permit, which could be in the form of a checklist or other agreed format.

Risk assessment / other documentation for close working should be retained for contact tracing purposes.

18 COVID-19 Suspect / Confirmed Cases

Suspect COVID-19 Case at Work

What to do if an employee becomes unwell and you believe they have been exposed to COVID-19:

- ▶ If someone becomes unwell in the workplace with symptoms such as cough, fever, difficulty breathing, the unwell person should be removed to an area which is at least 2 metres away from other people. If possible, find a room or area where they can be isolated behind a closed door, such as a staff office. If it is possible to open a window, do so for ventilation. Request individual to wear face mask to prevent contamination of area and close by personnel.
- ▶ The individual who is unwell should call their doctor and should outline their current symptoms. They should return home and await public health guidance - details are available here: <https://www2.hse.ie/conditions/coronavirus/testing/how-to-get-tested.html>
- ▶ The management team of the office or workplace will be contacted by the HSE to discuss the case, identify people who have been in contact with them and advise on any actions or precautions that should be taken. Experience to date has shown that this can take some days. In an individual case, the HSE will not contact the employer. It is advisable to carry out contact tracing relating to this individual and in the event, they prove positive, advise all close contacts.
- ▶ A risk assessment of each setting will be undertaken by HSE with the lead responsible person. Advice on the management of staff and members of the public will be based on this assessment. The HSE will also be in contact with the case directly to advise on isolation and identifying other contacts and will be in touch with any contacts of the case to provide them with appropriate advice.
- ▶ Advice on cleaning of communal areas such as offices or toilets is outlined later in this document.
- ▶ See Section 24 for "Sample Site Response to a Covid 19 suspect / confirmed Case".

Contact Tracing Log

The Work Safety Protocol advises employers to keep a log of contact/group work to facilitate contact tracing.

A close contact is anyone who has spent more than 15 minutes, face-to-face, within two meters of a person with COVID-19 in any setting, including a workplace, or someone who has shared a closed space with a confirmed case for more than two hours. Any incidences that meet these criteria should be logged by employers.

Should an employee become COVID-19 positive, public health officials may request the log as part of the contact tracing process. According to the HSA, the log should include details such as date / names of participants / duration of contact to help contact tracing teams determine who might qualify as a close contact. Logs should be held for 28 days, after which time they can be discarded.

To ensure rapid response to a situation where workers are close contacts, site management should do on site contact tracing and advise "close contacts" to follow HSE guidance: <https://www2.hse.ie/conditions/coronavirus/testing/if-you-are-a-close-contact.html>

Confirmed COVID-19 Case at Work

Experience has shown, that while the below is the official advice from the HSE, this process is slow and can lead to delays in responding. It is advised, if a positive case is identified and is connected to the site / workplace, management should instigate a contact tracing process and advise close contacts identified to follow the HSE advise as outlined in: <https://www2.hse.ie/conditions/coronavirus/testing/if-you-are-a-close-contact.html>.

Key points for construction industry in responding to a case of COVID-19

Response to an isolated case of COVID-19 on a site:

- ▶ When a case of COVID-19 is identified, the case will be contacted by the Public Health Contact Tracing team who will:
 - Inform the case of their diagnosis.
 - Identify and collect contact details of all close contacts from the case, including community contacts and workplace contacts.
 - Collect details of any congregate settings identified which may be contacts; this would include any building sites a construction worker may have worked on during the time period that they would be considered infectious. The case will be asked to provide contact details for their line manager.
- ▶ The contact tracing team will then contact all close contacts and organise testing for them according to guidelines.
- ▶ In the case of a workplace, the line manager will receive a call from Public Health, who will discuss work place practices, undertake a risk assessment and provide advice.

What to do if an employee informs you that they have tested positive for COVID-19:

- ▶ If a line manager is informed by their employee that they have tested positive for COVID-19, the line manager should proceed as follows:
 - Reassure workers that all close contacts will be contacted by Public Health and appropriate follow up arranged.
 - If any workers at the site are displaying symptoms of COVID-19 they should be advised to self-isolate and to contact their GP to arrange testing, however testing of asymptomatic co-workers is not required unless they have been identified as close contacts by Public Health.
 - It is not necessary to close a site or part of a site in response to an isolated case of COVID-19, unless it is not possible to continue operating - for example in a situation where an entire team have been deemed to be close contacts and therefore will need to restrict their movements, thus necessitating closure due to insufficient staffing levels.
 - The line manager of the case should expect to receive a call from the Public Health contact tracing team if their work place is deemed to have been exposed to the case during their infectious period.

What to do if you have been informed of multiple cases of COVID-19 amongst your workers:

- ▶ If a line manager is informed of multiple confirmed cases of COVID-19 on their site and has concerns that there may be a cluster of cases linked to the site:
 - The line manager should contact Occupational Health or their local Public Health Department (see attached contacts) in a situation where multiple laboratory-confirmed cases of COVID-19 occur on a site.

Note: Close contact is defined by the HSE as spending more than 15 minutes face-to-face contact within 2 metres of an infected person / living in the same house or shared accommodation as an infected person.

Note: Further information on getting tested for COVID-19 is available on the HSE website: <https://www2.hse.ie/conditions/coronavirus/testing/how-to-get-tested.html>

19 Return to Work Process - Worker

To return to work following a positive case diagnosis, an employee must follow this protocol and the HSE guidance at <https://www2.hse.ie/conditions/coronavirus/returning-to-work-safely.html>.

Fitness for Work should be considered from two perspectives:

1. Does their illness pose a risk to the individual themselves in performing their work duties?
2. Does their illness pose a risk to other individuals in the workplace?

The following steps should be followed, in line with current public health advice in Ireland:

Any worker who has displays symptoms consistent with COVID-19 must stay away from work, self-isolate and contact their GP by phone as part of the triage process.

They must also notify their line manager / employer. An individual will be classified as either a suspected or confirmed case, based on HSE decision to test / outcome of test.

An individual must only return to work if deemed fit to do so and upon approval of their medical advisor and having coordinated with their line manager/designated HR/employer contact.

The employee should complete the return to work form: https://www.hsa.ie/eng/topics/covid-19/return_to_work_safely_templates_checklists_and_posters/return_to_work_form.pdf

When an individual is symptom-free and are deemed fit to return to work, the key criteria are:

1. 14 days since their last 'close contact' with a confirmed/ suspected case and have not developed symptoms in that time, or
2. 10 days since the onset of their symptoms and 5 days since their last fever (high temperature) (<https://www2.hse.ie/conditions/coronavirus/managing-coronavirus-at-home/self-isolation.html>), or
3. They have been advised by a GP / healthcare provider to return to work.

Where an individual tested positive because they are a close contact, they may have no symptoms. In this case, they can stop self-isolating 10 days from the date of testing.

Line Manager/designated Employer/HR should confirm the relevant criteria above with the individual and write down their responses.

- [1] *Individual must self-declare their fitness for work in the absence of having a fitness for work certificate from their GP/healthcare provider. This is in acknowledgement that GP's don't currently have capacity to be issuing return to work certificates.*
- [2] *Close contact is defined by the HSE as spending more than 15 minutes face-to-face contact within 2 metres of an infected person / living in the same house or shared accommodation as an infected person. [This is only a guide].*

20 Cleaning Spaces with Suspected / Confirmed Cases

- ▶ It is recommended cleaning an area with normal household disinfectant after a suspected coronavirus (COVID-19) case has left will reduce the risk of passing the infection on to other people
- ▶ If an area can be kept closed and secure for 72 hours, wait until this time has passed for cleaning as the amount of virus living on surfaces will have reduced significantly by 72 hours
- ▶ For cleaning purposes, wear a face mask, disposable or washing up gloves. These should be double-bagged, then stored securely for 72 hours then thrown away in the regular rubbish after cleaning is finished
- ▶ Using a disposable cloth, first clean hard surfaces with warm soapy water. Then disinfect these surfaces with the cleaning products you normally use. Pay particular attention to frequently touched areas and surfaces, such as bathrooms, grab-rails in corridors and stairwells and door handles
- ▶ If an area has been heavily contaminated, such as with visible bodily fluids, from a person with coronavirus (COVID-19), consider using protection for the eyes, mouth and nose, as well as wearing gloves and an apron
- ▶ Wash hands regularly with soap and water for 20 seconds, and after removing gloves, aprons and other protection used while cleaning

Principles of cleaning after the case has left the area

Personal Protective Equipment (PPE)

- ▶ The minimum PPE to be worn for cleaning an area where a person with possible or confirmed coronavirus (COVID-19) is disposable gloves and an apron. Hands should be washed with soap and water for 20 seconds after all PPE has been removed.
- ▶ If a risk assessment of the setting indicates that a higher level of virus may be present (for example, where unwell individuals have slept such as a hotel room or boarding school dormitory) or there is visible contamination with body fluids, then the need for additional PPE to protect the cleaner's eyes, mouth and nose might be necessary.

Cleaning and Disinfection

Public areas where a symptomatic individual has passed through and spent minimal time, such as corridors, but which are not visibly contaminated with body fluids can be cleaned thoroughly as normal.

All surfaces that the symptomatic person has come into contact with must be cleaned and disinfected, including:

- ▶ objects which are visibly contaminated with body fluids
- ▶ all potentially contaminated high-contact areas such as bathrooms, door handles, telephones, grab-rails in corridors and stairwells
- ▶ Use disposable cloths or paper roll and disposable mop heads, to clean all hard surfaces, floors, chairs, door handles and sanitary fittings, following one of the options below:

- ▶ use either a combined detergent disinfectant solution at a dilution of 1,000 parts per million available chlorine

or

- ▶ a household detergent followed by disinfection (1000 ppm av.cl.). Follow manufacturer's instructions for dilution, application and contact times for all detergents and disinfectants

or

- ▶ if an alternative disinfectant is used within the organisation, this should be checked and ensure that it is effective against enveloped viruses

Additionally:

- ▶ Avoid creating splashes and spray when cleaning.
- ▶ Any cloths and mop heads used must be disposed of and should be put into waste bags as outlined below.
- ▶ When items cannot be cleaned using detergents or laundered, for example, upholstered furniture and mattresses, steam cleaning should be used.
- ▶ Any items that are heavily contaminated with body fluids and cannot be cleaned by washing should be disposed of.
- ▶ If possible, keep an area closed off and secure for 72 hours. After this time the amount of virus contamination will have decreased substantially, and you can clean as normal with your usual products.

Laundry

Wash items in accordance with the manufacturer's instructions. Use the warmest water setting and dry items completely. Dirty laundry that has been in contact with an unwell person can be washed with other people's items.

Do not shake dirty laundry, this minimises the possibility of dispersing virus through the air.

Clean and disinfect anything used for transporting laundry with your usual products, in line with the cleaning guidance above.

Waste Management

Waste from possible cases and cleaning of areas where possible cases have been (including disposable cloths and tissues):

1. Should be put in a plastic rubbish bag and tied when full.
2. The plastic bag should then be placed in a second bin bag and tied.
3. It should be put in a suitable and secure place and marked for storage until the individual's test results are known.

Waste should be stored safely and kept away from children. You should not put your waste in communal waste areas until negative test results are known or the waste has been stored for at least 72 hours.

- ▶ if the individual tests negative, this can be put in with the normal waste
- ▶ if the individual tests positive, then store it for at least 72 hours and put in with the normal waste.

21 Statutory Training Updates

Safe Pass

On the 31st of March 2020, the Minister Pat Breen signed a Statutory Instrument that extends the expiry date of Safe Pass cards, that expired since the 1st March 2020 for the duration of the COVID-19 emergency.

Safe Pass courses recommenced on 15th June, with participants limited to 8-10 (min-max), and extended hours to facilitate more breaks and social distancing. For information on Safe Pass courses in operation, email: csuinfo@solas.ie

Under Level 5 of the “National Framework for Living with Covid 19”, Safe Pass and CSCS programme delivery will continue.

Please note, site personnel for which there is a mandatory requirement for Safe Pass are – “General Construction Workers / Craft workers and on-site security personnel”. It is recommended that companies review their own company policies that might extend beyond this at this time.

Should it be a client requirement that “everyone” on site must have Safe Pass – this requirement should be revisited.

Construction Skills Certification Scheme (CSCS) card renewal

The Safety, Health and Welfare at Work (Construction) Regulations 2013 still apply on construction projects and therefore, the categories of workers carrying out operations listed on Schedule 5 of the Regulations, must be in possession of current cards – the renewal of these cards does not require the attendance at a training / renewal programme and can be achieved by following the instructions below;

Renewal of CSCS Card

To renew a CSCS Experienced Operator Registration Card, complete the online form at:

<https://cardrenewals.solas.ie/#/cscs/renew> and attach a current passport-quality photograph together with an online payment.

Replacement CSCS Card

If a CSCS Registration Card has been lost, stolen or damaged, the owner can apply for a replacement, attaching a current passport-quality photograph together with an online payment.

See: <https://cardrenewals.solas.ie/#/cscs/replace>

First Aid Responder Training

The following information was issued by the Pre Hospital Emergency Council (PHECC). PHECC are very aware of the pressures that the current Covid-19 restrictions are placing on RI/ATIs who deliver PHECC responder level courses, and on organisations who are looking to access places on those courses for their staff.

PHECC acknowledged in March 2020 that if a Responders certification had lapsed, an RI/ATI may allow an extended grace period before a full course would be required to maintain FAR certification.

PHECC Council, at their meeting on November 12th 2020, further advise that if a Responders certification has expired between March 2020 and March 31st 2021, a Responder may complete the 2 day FAR refresher course to maintain FAR certification.

PHECC have confirmed that they are not in a position to extend the expiry date on FAR certificates, which certifies a minimum level of competence in First Aid Response and neither are PHECC recognised RI/ATIs.

See: https://www.phecit.ie/PHECC/Publications_and_Resources/Newsletters/Newsletter_Items/2020/Update_on_FAR_Responder_recertification.aspx

22 Government's Work Safety Protocol

On 20th November 2020, the Government launched a 'Work Safety Protocol', which is a revision of the 'Return to Work Safely Protocol' published in May 2020. The revised Protocol incorporates the current advice on the Public Health measures needed to reduce the spread of COVID-19 in the community and workplaces and is issued by the National Public Health Emergency Team (NPHE), the Department of Health and the Government. The updated advice includes information on the management and control of outbreaks, selection of hand sanitisers, wearing of masks and ventilation of workplaces to reflect knowledge gained since the start of the pandemic. The Work Safety Protocol may be found at: <https://www.gov.ie/en/publication/bb7fd-work-safely-protocol/#work-safely-protocol>

Some key highlights/changes include:

Page 2 & 3 – Airborne Transmission of COVID-19

"Airborne transmission is the spread of a virus in very tiny respiratory particles. This can happen over a longer distance and persist for a longer time than droplets, such as within a room. Airborne transmission does not appear to play a major role in the spread of COVID-19. However, it can happen in some situations. To minimise this risk, keep indoor spaces well ventilated (aired out) by opening windows and doors if possible.

Research has also now identified specific types of working environments where the spread of COVID-19 is more likely to occur, often due to environmental factors. For example, there have been reported outbreaks of COVID-19 in some closed space settings, such as meat processing plants, nightclubs, places of worship, restaurants, and workplaces where people may be shouting or talking loudly. In these outbreaks, airborne transmission (specifically in indoor locations that are densely populated and inadequately ventilated) cannot be ruled out. In these high-risk environments, a greater level of adherence by employers and workers to the specific public health advice for such settings is required".

Page 5 – Provision of COVID-19 Info. in Other Languages

"Include in the plan any specific communication measures that are required for workers whose first language may not be English. In such workplaces, employers should identify leads who can act as communicators to particular groups. Such leads may also be nominated as the lead worker representative. The HSE have provided translations of their COVID-19 Resources".

Page 5 & 6 – Expanded Duties on Employers for Record-Keeping and Information-Sharing

Employers will:

- ▶ "maintain up-to-date information on all workers (full-time, part-time, contract and agency) in the workplace. Such information should include at a minimum the name, address and contact phone number of the individual worker. This information will be needed by the Department of Public Health in the event there is a case or outbreak".
- ▶ "provide information on how to receive illness benefits or other Government COVID-19 supports".
- ▶ "provide public health advice and information in languages other than English as required. Consideration should also be given to providing a variety of information on TV monitors in prominent locations (canteens, access/egress points) to enhance uptake of key messages".

Page 7 – Employer Responsibilities

Employers will:

- ▶ "minimise rotation of staff across multiple settings and workplaces, particularly in relation to staff employed under agency contracts".

22 Government's Work Safety Protocol *continued*

Page 13 – Pre-Return to Work Measures - Additional Questions for Self-Declaration Forms

Employers must:

- ▶ “include the following questions on the form. If a worker answers Yes to any of them, they are required to follow the medical advice they receive or seek medical advice before returning to work:
 - Do you have symptoms of cough, fever/high temperature, difficulty breathing, loss or change in your sense of smell or taste now or in the past 14 days? **Yes/No**
 - Have you been diagnosed with confirmed or suspected COVID-19 infection in the last 14 days? **Yes/No**
 - Are you awaiting the results of a COVID-19 test? **Yes/No**
 - In the past 14 days, have you been in contact with a person who is a confirmed or suspected case of COVID-19? **Yes/No**
 - Have you been advised to self-isolate at this time? **Yes/No**
 - Have you been advised to restrict your movements at this time? **Yes/No**
 - Have you been advised to cocoon at this time? **Yes/No.**

Note: if you're at very high risk (extremely vulnerable) from COVID-19 you may be advised to cocoon”.

Page 14 – Expanded Section on Temperature Testing and COVID-19 Testing

Employers must:

- ▶ “implement temperature testing as advised by Public Health. Currently there is no public health requirement to undertake temperature testing/screening in the workplace. However, in certain sectors and workplaces, Public Health have advised the employer to put in place temperature check, for example on entry to the facility or during shift work, and in such sectors, the employer will implement this requirement as it is advised by Public Health.
- ▶ implement any COVID-19 testing that may be required as part of mass or serial testing requirements as advised by Public Health”.

Page 34 – Selection of Hand Sanitisers / Grouping of Workers in Pods

“Employers should ensure that all sanitisers and disinfectants they have in the workplace carry a PCS 9xxxx, PCS 1xxxxx, IE/BPA 7xxxx or an EU-000xxx-xx registration number on the label. Each product registered by DAFM will carry a unique registration number specific to that particular product”.

“... workers should be organised into pods or groups, where possible. Pod members should work together, take their breaks together, change together and as far as possible even travel to work together, etc.”.

Coronavirus (COVID – 19)

XXX PROJECT NAME HERE XXX

If you answer yes to one or more of the following,

1. If you have been in close contact with a confirmed COVID-19 case
2. If you have travelled to Ireland from another country other than northern Ireland.
3. You are showing symptoms of the COVID – 19 virus (in line with the HSE guidelines www.hse.ie)
 - Shortness of breath
 - Breathing difficulties
 - Fever (high temperature)
 - A cough,
 - Sudden loss of sense of smell or taste
 - Flu like symptoms

Please take the following steps:

1. Do not enter site
2. Contact the HSE helpline for advice
3. Contact site management and keep them informed on updated on progress.
4. Site Management will take advise from the HSE helpdesk and follow their instructions as necessary.
5. Site Management will issue an update to all site personnel on any additional actions to be taken.

Confirmed POSITIVE Case!
Site will follow advice and instructions of the HSE and advise site of the appropriate action to be taken.

Confirmed NEGATIVE Case!
No further action required with individual and continue to follow HSE guidelines and precautions..

SAMPLE - SITE RESPONSE TO SUSPECTED COVID -19 CASE

Pre-Testing	Person presents as having been identified as a Close Contact with a confirmed Covid-19 case by the HSE	Person presents with symptoms of Covid-19		
	<ul style="list-style-type: none"> Notify Company/ Project Management and EHS of the individual. Individual is told to go home and isolate. Check if the individual identified as a Close Contact has been working closely with others on site. Consider removing these others as well, until the Close Contacts test result has been confirmed. 	<ul style="list-style-type: none"> Notify Company/Project Management and EHS of the individual. Individual is told to go home to isolate and contact their GP. Check if the individual with symptoms has been working closely with others on site. Consider removing these others as well, until the individual with symptoms condition has been confirmed. 		
Post-Testing	Confirmation of Positive Covid-19 Test		Confirmation of Negative Covid-19 Test	
	<ul style="list-style-type: none"> Notify Company Management and EHS of positive case. Notify Clients and Project Managers. Notify all project stakeholders, including subcontractors, design teams and any other regular visitors to site. Arrange additional cleaning resources with cleaning contractor with immediate effect to focus on any suspected contaminated areas. Hold a briefing with all site personnel to update them of the communication that was issued to their employers and give them an opportunity to raise concerns or queries. If it is a single isolated case, send email to HSE point of contact. HSE may or may not contact the site. Where there is more than one Covid-19 positive case, engage with the HSE by phone and email for further guidance. <p>Prepare to discuss the following with HSE during dialogue:</p> <ol style="list-style-type: none"> Contact tracing Access control to site Control measures following confirmed case Existing cleaning protocol on site Welfare facilities Individuals work activities Travel to work, commuting/walking to site Interaction off site Imminent risk of partial or site closure. <p>Individual can return to work when they have been:</p> <ul style="list-style-type: none"> 5 days without a temperature, and 10 days since first symptom developed and individuals' symptoms are improving. 	Negative test for Close Contact	Negative test for Symptoms	
		<ul style="list-style-type: none"> Test results for both day 1 and 7 (where a second test is completed) must be sent to Company/Project Management confirming negative result. Continue to isolate as per HSE guidelines. Once the 14-day isolation period is complete and no symptoms appear during this time the individual can return to work. 	<ul style="list-style-type: none"> Test results must be sent to Company/Project Management confirming Covid-19 negative. Individual can return to work when they have no symptoms of illness. 	
Continue with communications to all site personnel including:				
<ol style="list-style-type: none"> Continue to wash hand. Continue to maintain 2 metres. Wear face coverings from the entrance point. Recommend downloading and use of the HSE tracker app.
